

Pat's JV1080 - BCR2000 Mark 2.

JV1080 Temp Patch Edit.bc2 is a BCR layout which operates on the temporary patch area of the Roland JV-1080.

21 presets are used, all with snapshot turned on and the contents affect all aspects of a Single patch.

JV1080 Temp Part 1 and Patch Edit.bc2 is a BCR layout which operates on both the temporary patch area and the temporary patch area of Performance Part 1 of the Roland JV-1080.

25 presets are used, all with snapshot turned on and the contents affect all aspects of a Single patch in the Temporary patch and the Temporary Performance part 1 areas of the JV-1080.

The idea was to set the synth up in Performance mode and use other parts with a sequencer or output from say Reaper and jam along with it and have some good old-fashioned knob twistin fun.

Preset 8. - Tones 1-4 Wave Select encoders output values from 256 - 1663.

256 - 383      USER

768 - 895      PRA

1024 - 1279    PRB

1280 - 1407    PRC

1536 - 1663    GM

Took me a little while to figure how to get the BCR to give the 1080 what it needed here. So there's a few gaps - it works!

The Group select encoders allow me to access an Orchestral expansion pack in which case EXP-A needs to see Tone Select encoder values from 512 to 685
